

LEADING with LIBRARIES

CLEAN ENERGY NH
Your Voice in All Energy Matters

Community-Based Energy Action in Rural New Hampshire

Our team is working with three public libraries to achieve broader, more equitable access to clean energy. We are launching solar and battery projects at library buildings to increase awareness and adoption of clean energy, while also developing hands-on programming—informed by the community and offered through local libraries—to support residents in completing home energy projects. We’ll learn what works best and bring those solutions to libraries and communities statewide.

What’s the one thing EVERY community has? A LIBRARY.
