

TECHNICAL ASSISTANCE REQUEST:

- (1) Assistance with the manufacturing of the mold and injection molding manufacturing facilities for the version 2 solar panel docking platform 11 degree tilt for the plastic injection molding process. Produce 30 pieces prototype of the version 2 solar panel docking platform 11 degree tilt using recycled plastics. Produce 120 pieces of the maintenance access platforms and accessories with the existing molds.

- (2) Assistance with the testing of the prototype version 2 solar panel docking platform 11 degree tilt with the maintenance access platform on a small scale with 30 solar panels string for
 - a. Stability and strength floating in fresh water with 72 cells solar panels with loads on the maintenance access platforms.
 - b. Environmental impact short term and long term with the recycled plastic materials.
