

# Pickup & Go: Solar + Storage + Electrification

## All-in-one solution for tribal, rural, and natural disaster resiliency

Enabling cost-effective, fast, and safe deployment of critical and life-saving electrical energy solutions to rural or tribal lands, and for use in natural disaster recovery.

This technical solution will provide a pre-packaged, skid-mounted solar, storage & custom tethered satellite power station utilizing armored cable to safely bring electricity inside existing buildings to power key devices such as charging for laptops and cell phones, emergency heating, lighting, induction cooktops and food refrigeration that can be set up entirely by volunteers or homeowners.
