

Lightweight, efficient solar panels

*Swift Solar team members invented perovskite tandem technology together with **Stanford, MIT, and NREL***

PERFORMANCE
advantage

- High efficiency: > **30% line-of-sight cell** (\cong GaAs)
- High weight-specific power: > **500 W/kg** (>10 \times c-Si)

COST
advantage

- Low projected module costs: < **0.20 \$/W**
- System savings for low projected LCOE: **30% below c-Si**
