

Let's Go!

We are currently in need of funding, and a testing facility to accomplish our goals. With a strong base to our foundation, this project could scale faster than expected. It is exciting to know that this project is a team effort. The entire Planet will become a team again, to fight climate change together. Not only are we changing ourselves from the inside out, we are changing the World from the inside out, as one. It is a win-win for everyone, as life should be. If a fitness center was willing to donate a portion of their facility to this project, all the funding would be to the cost of equipment, and the time our testing team, engineers, and staff. Hard data would be collected over a 6 month period to acquire consumption offset. Solid partnerships with American Made companies like Life Fitness, Mission Solar, REC Solar, etc. (batteries under study) would dial in the transport issues, if any. I strongly believe it's all about having the right people in the same room. Vibes will be checked at the door 😊 LET'S GOOOO!

RESERVOIR STORAGE UNITS
The latest in energy storage technology, the Reservoir Storage Unit (RSU) is a modular, scalable solution for energy storage. It is designed to be used in a variety of applications, from residential to commercial. The RSU is a high-capacity, long-life battery that can store energy for up to 10 hours. It is a modular unit that can be scaled up to meet your needs. The RSU is a high-capacity, long-life battery that can store energy for up to 10 hours. It is a modular unit that can be scaled up to meet your needs.

SYSTEM CONFIGURATIONS
The Reservoir Storage Unit (RSU) is a modular, scalable solution for energy storage. It is designed to be used in a variety of applications, from residential to commercial. The RSU is a high-capacity, long-life battery that can store energy for up to 10 hours. It is a modular unit that can be scaled up to meet your needs.

Christmas List

- **Partnership with Equinox**
- **6 month testing site @ Equinox South Beach**
- **\$\$\$ for carports on top of building (line items and proposal upon request as I have designed it already)**
- **10 gym members willing to donate their time for a 6 free months @ Equinox**
- **1 Electrical Engineer**
- **1 Structural Engineer**
- **1 Master Electrician**
- **Install crew for carports (Solar Foundations)**
- **1 Personal Assistant**
- **Golf Cart**
- **Video Crew/ Drone Team/ Timeline Video a must**
- **GOOD VIBES**
