

Solar Guardian® Intelligent Metering, Monitoring, & Management System

Advancing the use of solar energy requires constant awareness of energy production and safety while managing how PV energy is used throughout the day.

Advanced artificial intelligence works 24/7 to detect conditions that left unattended reduce ROI and could result in hazards of fire and electrocution.

Key Features and Benefits

- ❖ Improves the return on investment
- ❖ IoT and cybersecurity
- ❖ User-defined rules
- ❖ 24/7 monitoring of safety and efficiency
- ❖ Manages power consumption and storage
- ❖ Apps display the current ROI and safety situation
- ❖ Actuators take defective components offline
- ❖ Performs rapid shutdown
- ❖ Maintains database of power production
- ❖ Easy to install
- ❖ No additional wiring is required
- ❖ End-user notification via cellphone app
