

## SOLAR LIGHTING KIT

**1 Solar Panel**  
(300 Watt)

**5 Lights**  
(20 LED Bulbs)

**1 Optional  
Battery**

# LIGHT THE DARK

Direct from solar lighting

The Humless solar variable lighting solution is a relatively low cost LED lighting system. Up to 20 LED bulbs can be powered directly by a single 300 watt solar panel with no **AC inverter required**. Also connect to a single DC battery **without a separate energy management system**.

## BENEFITS

- No need for inverters or battery management systems
- Provides daytime light directly from solar
- Provides nighttime light from a battery or grid
- Charge batteries directly from solar with excess power

## APPLICATIONS

- Off-grid situations
- Emergencies
- Green living
- Domestic & Commercial
