

Who we are

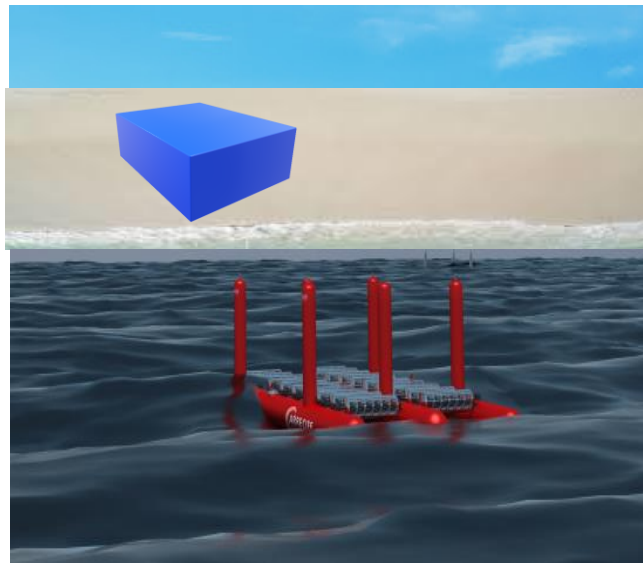

Based in Florida, UAT TEAM is international water treatment engineering company funded in 2004 with a large experience developing water treatment EPC (engineering , procurement and construction) projects with more than 200 successful projects in the most of LATAM and Caribbean countries.

Based in Spain (Europe), Arrecife is an engineering company with a patent system to extract energy from waves, currents and river flows.

The concept

- Direct Turbines/Floating Platform
- Electrical Interconnection
- Highly Efficient Reverse Osmosis
- Energy Recovery Device
- High Performance Membrane
- Drink Water: 6-8 GPH<500ppm TDS
- Low concentrate Brine <40.000 ppm
- Direct intake

Benefits

WEC

- ✓ Turbines to harness both horizontal and vertical components of the waves
- ✓ It works with waves and river currents
- ✓ Proven technology
- ✓ Modular
- ✓ Commercial components
- ✓ Single mooring line

Desalination Unit

- ✓ Proven, robust, reliable and maturity technology
- ✓ Efficiency device using pascal fundamentals
- ✓ Quiet continuous operation
- ✓ Scalable
- ✓ Easy to install and to deploy
