# AC Diode

**Safer** – The AC Diode guarantees that any source (solar or battery) complies with the NEC by guaranteeing a back-fed only circuit.

**Simpler** – Plug-and-Play does not need a new circuit ran at a high cost. Further, if the customer requires, AC Diode saves labor with a fail-safe wireless disconnect.

**Smarter** – The device automatically uploads its power information to the cloud. Giving the user an energy monitoring platform.
