

## Solar AirWall

- ✓ Highly efficient daytime heating solution
- ✓ Payback on investment is Less than 2 winter seasons in the US or 1 winter season in the EU
- ✓ Dramatic elimination of greenhouse gasses such as CO2 when compared with traditional heating methods

- ✓ Made with 100% recycled plastic
- ✓ High surface area for efficient solar passive heating
- ✓ Integrated greenhouse shield nearly doubles its heat collection capabilities
- ✓ Draws air from inside at ceiling level and heats via solar energy then returns the heated air at floor level
- ✓ Works efficiently ***EVEN*** at low light conditions
