

## **TECHNICAL ASSISTANCE REQUEST**

Unique needs which a national lab, private facility, and/or member of the American-Made Network could potentially help us resolve are:

- 1- Developing the final prototype of the power electronic converter.
- 2- Comparison study conducted by national lab to quantify the power gain provided by the proposed power optimizer over the currently commercialized power optimizers.
- 3- Conducting compliance tests needed for certification of the power electronics converter.

In addition to the above technical support, the following mentoring support will be appreciable:

- Business Development and Fundraising
- Government and Regulations
- Finding a business manager to partner with.
- Marketing and Communications Operations
