Hi Jim,

Hope this finds you well. I am a research professor with the Alaska Center for Energy and Power (ACEP) at UAF and recently read about your many energy-related inventions and ideas in the Nanook Nook. I hope I have reached the correct Jim White.

<https://spark.adobe.com/page/0hGki9lp5tfMH/>

I started what is now the thriving Solar Technologies Program at ACEP (acep.uaf.edu/solar), and we have branched into EVs recently as well (<http://acep.uaf.edu/ev-workshop>).

We'd love to spitball some ideas with you over the phone or next time you're in Alaska (I work in ACEP's Anchorage office, although lately everyone's been working from home).

Please let me know if you're available to talk.

Thanks,
Erin

Erin Whitney, Ph.D.
