

Contour Grid – Shape the Earth to power the world

Submersed Pumped Hydro Storage

- Low cost energy storage
- Improve Grid reliability and flexibility
- Build energy storage with advance robotic systems

The Problem		Traditional PHS	Submersed PHS
Physical	Land	700+ Acres	0 Acres
	Water	High Impact	No Impact
	Transmission	Usually distant	Near load pockets
Logistical	Community	High Impact	No Impact
	Environment	High Impact	Minimal Impact
Construction	Timeline	5 years	1 month
	Cost	~165 \$/kWh	<30 \$/kWh
