

Sun Deck Solar

Design Type 1 - Self Erecting

<p>The charging station frame can be shipped in a pre-assembled low profile design. Standard Solar Panels, Inverter, Battery, and Car Charging station can be shipped separately.</p>	 <p>1</p>	<p>Additional components (Solar inverter, Car Charter, Battery) can be installed and final wiring can be completed via plug and play methods.</p>	 <p>4</p>
<p>The solar Panels can be installed on top of frame while frame is lowered and requires so special equipment or manlifts.</p>	 <p>2</p>	<p>Using the top pivot point, the Solar array frame is lifted and locked into the final charging position.</p>	 <p>5</p>
<p>Using two pivot points, the charging frame primary support can be erected. The underside solar array frame is exposed for additional wiring and component installation.</p>	 <p>3</p>	<p>Sun Deck Solar charging station is ready for use.</p>	 <p>Complete!</p>
