Helios Edge lab connecting DERs

Problem ?

- Fossil Fuel Generation.
- Loss of Grid Power Costly.
- Limited Energy Sharing In Communities.
- Cyber Attacks.

Solution

- Clean energy using DERs and solar.
- Backup storage using batteries.
- Connect businesses together.
- Use blockchain technology to secure data.

Target Market

- Universities and Colleges.
- Business Parks.
- Remote Communities.
- Utility Companies.

Competitors

- DER manufacturers.
- Public blockchain companies.

Why Helios Edge ?

- Proven track record of building engineering systems.
- Quality, Reliability and Integrity throughout the project life-cycle.
- Built Helios software platform!

Revenue Model

- Annual Subscriptions.
- Trading Transaction %.
- H/W Integration of DER
- S/W Feature Upgrades.
- Data Monitoring.

Funding

- Business Partnerships.
- Federal Grants.
- Angel Investors.
- Self Funding.

Future

- Helios Pilot Sites.
- Technology Partners.
- Machine Learning 2022.
- Use T3DP Solar Technology.

Exit Strategy

- Currently privately owned.
- Seeking investors and buyers to join and make Helios into global leading technology!
