

Solar Stewards Marketplace

A marketplace that connects corporate renewable energy procurement with historically excluded communities

Corporate Energy Buyers

- BNEF forecasts that the 285 RE100 members will collectively need to purchase an additional 269TWh of clean electricity in 2030 to meet their RE100 goals
- Global corporate clean energy purchasing up 18% in 2020
- Corporate Social Responsibility (CSR) prioritizing social and environmental justice
- Corporates now have the opportunity to prioritize environmental and social justice within RE procurement with Social RECs

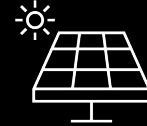

Community Partners

- Resources for energy equity work
- Workforce training partners
- STEAM teaching tools
- Storage Ready applications

Solar Energy Producers in Historically Excluded Communities

- Black- and Hispanic-majority census tracts have installed 69% and 30% less rooftop PV respectively for the same median household income.
- Race is the biggest determinant of proximity to toxic environments

Supplier Diversity

- Black people compose of 8 percent of the clean energy workforce
- Hispanic/Latinos making up 16.5 percent (versus 18 percent economy-wide).
