TokenTown: A Next-Gen Solar Community

Built in Opportunity Zones that are Community Owned and Operated

AMERICAN MADE SOLAR PRIZE — U.S. DEPARTMENT OF ENERGY

REtoken — The Real Estate DAO

The Problem

Most new homes get built without using the latest American-Made solar technology and there is a lack of adoption in underserved neighborhoods due to cost of installation.

The Solution

We're building TokenTown: Next Gen Solar Powered Communities in Opportunity Zones, capitalized using crowdfunding and security tokens. With the net positive energy, we will power crypto mining operations.

The Team

- Solar Solutions Partners
- SEC/FINRA & Registered Partners
- Home Builders
- Permitting
- DAO Governance
- Distribution
- Qualified OZ Funds

The Plan

Our plan is to execute our winning strategy using a community first approach. We will continue to engage industry leading solutions providers while building TokenTown Colorado.

Ready — **First 6 Months**: Engage leading solar solution providers * Partner with SEC/FINRA registered partners to run our crowdfund offering * Social Proof/NFT Launch: Offering 32 governance tokens at 1 Ethereum each * Partner with Qualified OZ Fund * Implement DAO governance tools

Set — **Second 6 months**: Finalize Solar Solutions * Identify and Purchase Land in OZ * Partner with Housing Builder * Complete any necessary permitting / zoning * Ongoing Community Governance with TokenTown CO Founding Citizens

GO! — **Third 6 months**: Refine process to be replicable * RFP for additional American Made Solar contractors * Monitor energy savings and usage to optimize * Identify next Opportunity Zone for future TokenTown Community
