

Light Quality

- High output- up to 5183 lumens per device
- Brilliant color rendition
- Tunable color temperature, consistent chromaticity
- Dimmable
- Flicker-free
- Low glare

Application-specific lighting modules

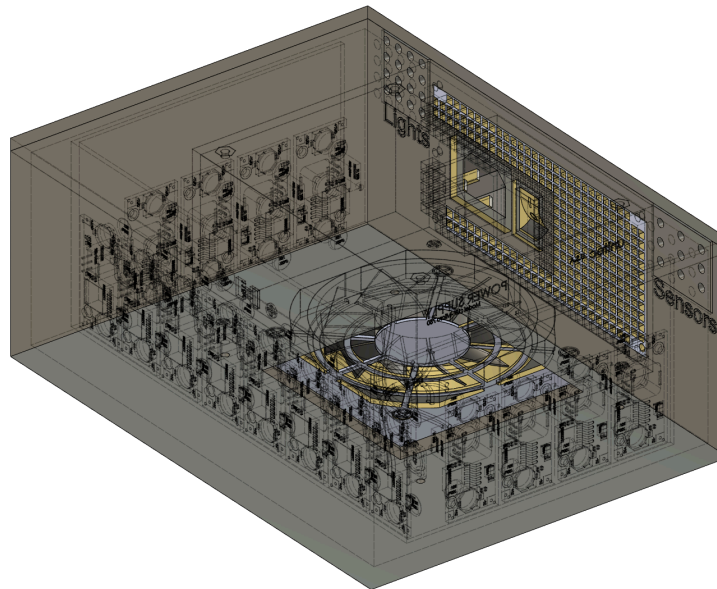

Quantum dot technology allows higher efficiencies and more accurate colors than possible with traditional LEDs.

Innovation

- Completely modular design
- Does not require hard wiring
- User-serviceable design
- Expandable
- Connected & smart

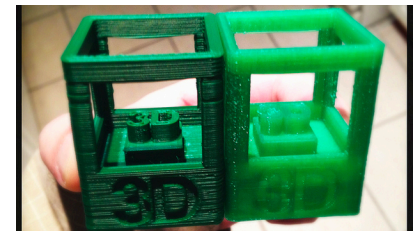

The control system provides flicker-free light with plenty of customization and future-proof modularity.

Sustainability and diversity

Multi-faceted inclusivity plan

1. Empowerment
 - Community-based installers
 - Open-source platform
2. Training
 - Free technical training materials and courses
3. Opportunity
 - Low cost of entry
 - Customized and community-manufactured accessories

Made from biodegradable plastics + recyclable metals
