PROJECT NAME: Capturing Energy in Extreme Downhole Conditions

TAGLINE: ROGUE - A Resonant Oscillatory Generator for Underground Environments

A device to capture energy in extreme downhole conditions

KEYWORD TAGS: downhole power sources, high temperature generator, lithium ion battery replacement

TEAM

Edem Tsikata, Cambridge, MA, edem.tsikata@gmail.com,617-939-6941, https://www.linkedin.com/in/edem-tsikata/

Sedina Tsikata, Orleans, France, sedina.tsikata@gmail.com, http://stsikataresearch.com/

Amar Vutha, Toronto, Canada, amar.vutha@gmail.com, http://uoft.me/vutha
