

Concentrated Solar Multi Effect Distillation and Dewatering Technology

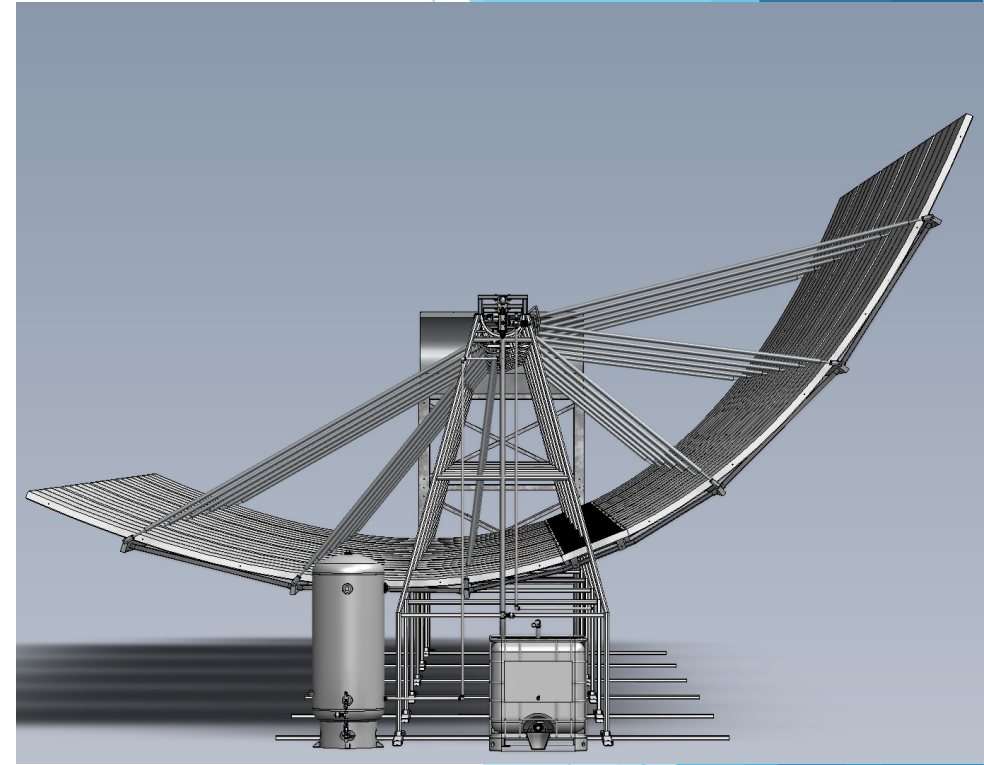

Produced Water Distillation System - Solar Thermal Horizontal Distillation and Brine Concentration Column

LIT and D&D Manufacturing intend to design, develop, and commercialize a solar-thermal distillation system which utilizes a horizontal column to distill freshwater from produced waters and brines

Team Composition: Nicholas Probert CEO, Dale Polk - Inventor CTO, Aaron Allen Structural Mechanical, Don Polk Electrical, Automation, Les Polk Lead Design, Material processing, Alexander Polk Project Lead

“Converting Waste Streams to Resource”
